

BMZ BioMedizinZentrumDortmund

As the competence center of the TechnologieZentrumDortmund for the fields of biotechnology and medical technology, the BioMedizinZentrumDortmund embodies an optimal workplace for young companies that want to be innovative and successful in these fields in the long term. Here, the diverse synergies are used intensively both within the center and in the immediate vicinity on the science and technology campus in Dortmund. Germany Today delegates visited the center and experienced an in-depth tour of the facilities including laboratories. The guided tour was led by Nicolas Brauckhoff from ProtaGene.

As a competence center, the BioMedizinZentrumDortmund supports the successful development of innovative start-up ideas from the fields of biomedicine, biotechnology, bioIT and proteomics with a comprehensive range of services for the settlement. Entrepreneurs can concentrate entirely on their business idea and build on existing experience and a strong network. The BioMedizinZentrumDortmund is available as a personal contact for all corporate issues and provides important contacts to investors, to science and to private companies. Synergy effects are also created through the cooperation between the tenants. With numerous network offers such as topic-specific events in cooperation with the Dortmund Economic Development Agency and regional organizations from the field of biotechnology, the targeted development of the young companies is promoted with combined forces.
